Babel REPL

The screenshot shows the Babel REPL interface with a yellow header bar containing the Babel logo and navigation links: Learn ES2015, Docs, Try it out (active), Blog, FAQ, and Team. On the right side of the header are search, donate, and social media icons.

The main interface is divided into four panels:

- Settings:** Includes checkboxes for Evaluate, Line Wrap, Minify, Prettify, and File Size.
- Presets:** Lists various presets like es2015, es2015-loose, es2016, es2017, stage-0, stage-1, stage-2, stage-3 (selected), and react.
- Env Preset 1.6.2:** Shows options for Browsers (last 2 versions), Electron (1.8), Node (8.9), and Built-ins (Debug).
- Plugins:** Includes a search bar and a list of plugins such as transform-es2015-modules-commonjs, transform-strict-mode, transform-regenerator, and others.

At the bottom, the code editor shows the transformation of the input code:

```
1 const sum = [1, 1, 1].reduce(_ + _);
```

The output code is:

```
1 "use strict";
2
3 var sum = [1, 1, 1].reduce(_ + _);
4
```

The output size is 50 Bytes. A red error message at the bottom indicates: `_ is not defined`.
